VERSATILE:

The Kennedy storage system will not obsolete itself as your requirements change. Re-configuration is easy with the bolt-on drawer fronts. If you choose at a later date to add two 4" drawers in place of one 8" drawer, you need purchase only one drawer body and slide system and a new 4" front for your present drawer.

The elimination of drawer carriers (a frame that the drawer fits into) enables us to use the full drawer height for storage. You get up to 15% more height and 34% more total storage volume. Thus for every three Kennedy Storage Systems, it could take four of the competitions' to get the same storage space.

DESIGN YOUR OWN CABINET:

Configuration of any drawer arrangement can be made provided the total of the drawer front heights is equal to the housing opening size. Ask your Kennedy distributor for details.

ADVANTAGE:

Up to 50% space savings over shelving. Up to 34% more storage space than some of the competition. The side mounted rails take up no drawer depth as do conventional carriage (under drawer) rail systems.

Each cabinet is equipped with the super-tough corner strengthening bracket shown above. Welded in place, it ensures maximum strength and rigidity. This is one of many quality features you expect from a **Kennedy** unit.

EXTRA WEIGHT CAPACITY DRAWERS:

- The 550# capacity drawers have a 100% extension capability and work smoothly on eight precision ball bearings.
- Drawer interlock system prevents opening more than one drawer at a time, thus preventing tipping of the cabinet.
- Drawers are painted with a tan epoxy powder coat.
- Drawers are deep drawn and have a rolled edge for safety and rigid strength.
- Drawer bottoms are embossed for added strength.
- Full length drawer pulls with contents marking insert and clear protective cover for easy identification of drawer contents.

STANDARD WEIGHT CAPACITY DRAWERS

Same as Extra Weight Capacity Drawers except:

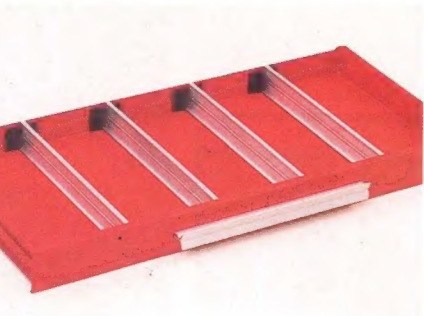

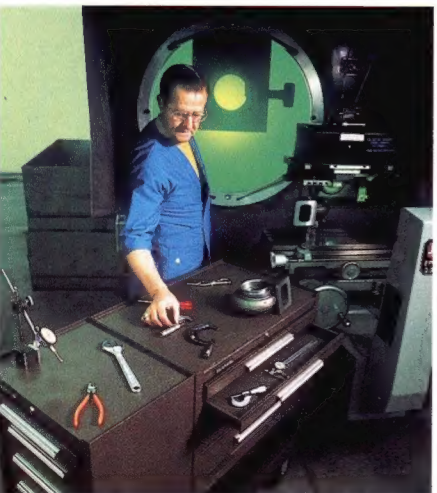

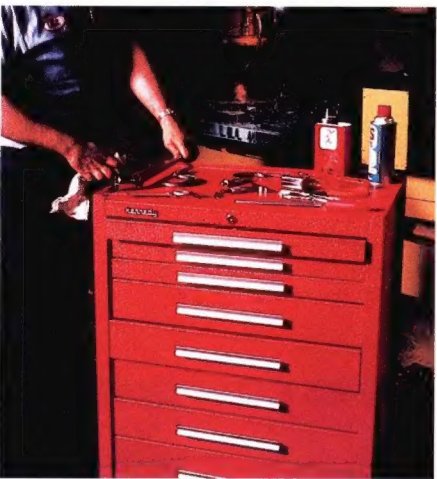

- The 220# capacity drawers have a 95% extension capability and work smoothly on four precision ball bearings.
- All models have **DRAWER INTERLOCK** to protect against opening more than one drawer and possibly tipping the unit (not included on the work station base model 56305).

- Body is coated with brown baked-on enamel paint.
- Body is 18 gauge (.048) steel.
- Body stiffeners are 16 gauge (top and bottom .060) steel.
- Slide mounting channels of 16 gauge (top to bottom 0.60) strengthen the cabinet sides.
- Fork lift channels are 12 gauge (.105) and have holes for lagging the cabinet to the floor. The fork lift channels are welded to the bottom of the cabinet and have snap-in covers to enhance appearance.
- FOUR multi-formed 16 gauge (.060) corner stiffeners welded to each of the front corners add strength and rigidity to the cabinet.
- Top and bottom pans are embossed for added strength.
- Keyed alike cabinets are available. Existing cabinets may be keyed alike by ordering replacement locks.

Roller Cabinets facts and features.

Cabinet top panels are rib embossed for added strength and rigidity. Ribs also allow air to penetrate between facing surfaces of chest and cabinet to help combat rust.

Durable, 2 mil thick baked finish helps fight corrosion, abrasions and chipping. Rust resistant metals or metal treatments help protect the beauty of your cabinet hardware, too.

Ongoing vibration, load impact and other destructive testing before, during and after assembly makes sure the products are built right. Every unit is inspected after final assembly to further improve quality control. And protect your investment.

Full-depth slide carrier channels provide support for the two-piece, I-beam drawer slides. And, play a large role in maintaining drawer balance. Slide limit stops keep the drawers from extending beyond the cabinet frame. Spring clips on the sides allow easy drawer removal for cleaning.

Heavy-gauge steel top, bottom and back panels are securely welded to the double-wall side panels; giving the cabinet a tight, solid, fit. This integral cabinet construction evenly distributes and transfers all drawer loads to the cabinet bottom panel and casters.

The heavy-gauge steel, one-piece cabinet bottom panels are cross-embossed to provide added strength and greater load capacity without sagging.

The tamper-proof, internal drawer locking system on Kennedy cabinets cannot be reached by bolt cutters or hacksaw. Or damaged when one drawer is closed with the cabinet locked.

Easy-roll, low-drag five-inch soft rubber casters can be used in most wet or corrosive environments. Two rigid and two swivel casters with toe locks are standard on all cabinets. Four 3-inch swivel casters are standard on 2005. Models 2707X, 2907, 2907X, 3407, 3407X and 3408 come with 5 x 2 inch roller bearing casters with grease fitting bolted to full-length heavy gauge, formed bottom reinforcements. Models 293, 295, 297, 376 and 378 come with 5 x 2 riveted sinter bearing casters.

The one-piece bottom panels are also welded outside the cabinet body for a hand-in-glove fit. Gives the cabinets a solid foundation to help absorb bumps and eliminate stress on the cabinet spot welds. It also provides an edge of protection if you accidentally strike the heel of someone walking ahead of you with the cabinet.

Adjustable, aluminum drawer dividers are standard on all 27, 29 and 34 inch cabinets. Help provide more tool separation without paying for more drawers. Held in place by spring clips to prevent shifting.

Mechanics' Chests facts and features.

Two-piece, I-beam drawer slides permit smooth, easy full drawer extension. And, they're stronger than one-piece slides which have weak shoulder areas and may split under heavy drawer loads.

Slide limit stops keep drawers from extending beyond the chest frame. Spring clips on the slides allow drawer removal for cleaning.

Rugged, cap-end construction on chest lids uses one of the strongest, self-reinforcing structural designs known to keep lids square and weathertight.

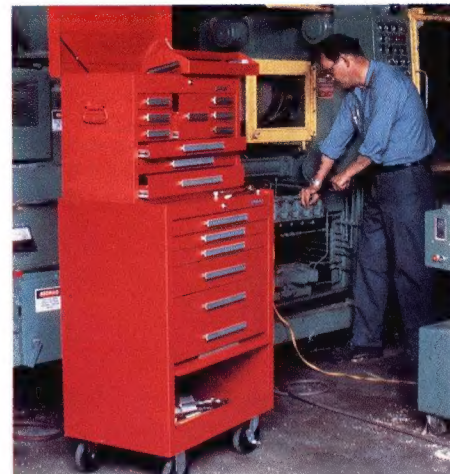

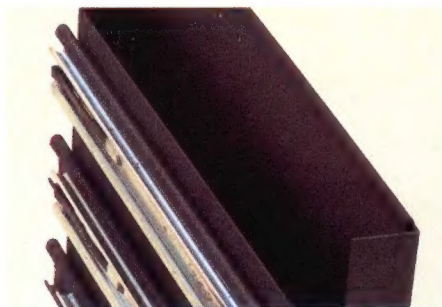

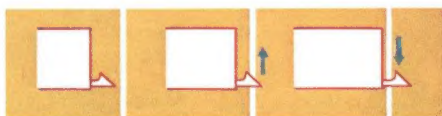

The tamper-proof, internal drawer locking system cannot be reached by bolt cutters or hacksaw. Or damaged when one drawer is closed with the chest locked.

Smooth operating, full-length chest hinges are staked and securely welded to prevent lid removal.

Deep embossed, inner lid panel reinforces chest lids. Helps keep lids square and rigid for easy opening and closing.

One-piece, heavy-gauge steel back, bottom and top till panels are securely welded to the double-wall side panels; giving the chests a tight, solid, fit. This integral, chest construction evenly distributes and transfers drawer loads to the chest bottom panel. An important aid in eliminating stress on the chest spot welds.

All chest exposed edges are rolled and flattened for added strength and safety.

Ball Bearing Slides Facts and Features

- Three member, full ball bearing slides with four levels of ball bearings permit effortless, feather-light movement even though drawers are fully loaded.
- Self-cleaning bridged retainers prevent dirt from building up and keep drawers operating smoothly for years.
- Hi-Lo temperature grease allow drawers to move easily in the coldest weather.

Important: A word about this catalog. We have tried to make this catalog as comprehensive and factual as possible. However, since the time of printing, some of the information may have been updated. Check with your Kennedy supplier for complete information. The right is reserved to make changes at any time, without notice, in prices, materials, specifications and models.

Chest and cabinet dimensions are given without hardware. Cabinet dimensions with casters. Width is left to right; depth is front to back; height is top to bottom.

Machinists' Chests facts and features.

Drop-front panels are double-wall construction for added rigidity and tool security. Your valuable tools can't walk away with the drop-front panel in place and the chest locked. Front panel conceals and secures drawers. Stores in base when not in use.

Take a look at the double-wall side panel. Both an inner and outer steel wall in a critical chest area. Look at the full-depth slides and slide carrier channels, too. This integral, side panel/slide construction evenly distributes and transfers drawer loads to the chest bottom panel. An important aid in eliminating stress on the chest spot welds.

Thick, wool felt drawer liners help keep tools clean and protect against corrosion.

Kennedy uses 700 cylinder lock and milled key changes to help protect your chest's contents. All Kennedy chests and cabinets come with two keys.

Chest lid hinges are equipped with rust-resistant, stainless-steel pins which are staked to prevent punch-out and lid removal.

Take the two-piece drawer slides on Kennedy machinists' chests. They are stronger than one-piece slides which have weak shoulder areas and may split under heavy drawer loads. Slide limit stops keep the drawers from extending beyond the chest frame. Spring clips on the slides allow drawer removal for cleaning.

Machinists' Chests

3-DRAWER 620

Drawers and top till wool felt-lined. Vinyl cushioned, steel core top handle.

Model 620 comes with four adjustable, zinc coated steel drawer dividers standard. Spring clips hold in place. Available in brown wrinkle finish.

Model 520 comes with six adjustable, zinc coated steel drawer dividers standard. Spring clips hold in place. Available in brown wrinkle finish.

Roller Cabinet Accessories

Make your tools last longer and your work easier by adding some extras to your Kennedy tool box.

Protect your roller cabinet against dents and scrapes with a set of corner bumpers made of hard rubber.

Guard your tools with Ace® high security locks. The same locks found in vending machines, pay phones, etc.

Lock up those valuables in steel security compartment. Can be riveted to any chest or cabinet drawer. Comes with pop rivets and cylinder lock and key set.

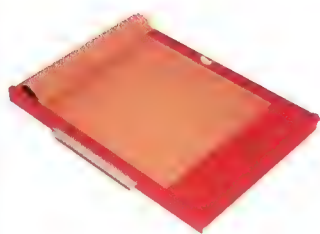

Line your cabinet drawers with rubberoid cork or polyethylene foam to protect your tools.

Protect from scuffs and abrasions with a vinyl top mat.

For those heavy duty jobs, use our 1½" thick maple cabinet tops available for all Kennedy roller cabinets.

Keep your screwdrivers handy by adding a screwdriver tray. Attaches to any Kennedy roller cabinet. Also holds standard aerosol spray cans.

Contact your local Kennedy distributor or write us for your free accessories catalog.

Roller Cabinet Add-Ons

Foldaway Shelf

DS1

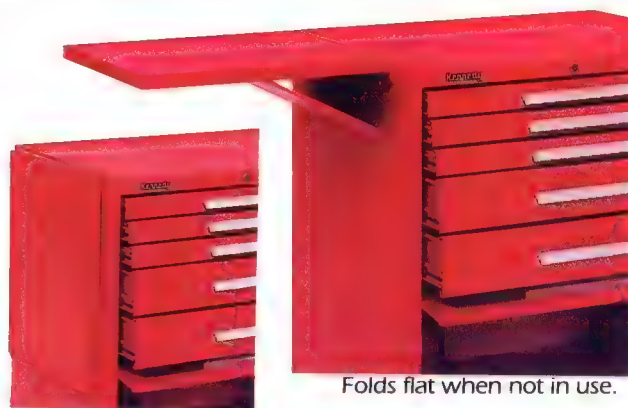

Provides 2.4 square feet of added work surface.
Folds flat when not in use.

Raised sides keep tools from rolling off.

Attaches to any 27, 29 or 34 inch wide cabinet.
Bolts furnished.

Choice of brown wrinkle or smooth red finish.

No.	Brn. EDP No.	Red Sm. EDP No.	Dimensions (Inches)			Net Wt. Lbs.	Ship Wt. Lbs.
